

Alfresco in an Hour

Michael
Farman

www.alfresco.com

Agenda

- Introduction
- User Interface
- The Basics
 - Spaces and Content
 - Creating and Editing Content
 - Permissions
 - Searching
- Collaboration
 - Versioning
 - Check in/out
 - Forums and Discussions
- Automating Tasks
 - Rules and Actions
- Simple Workflow
- Demonstration
- Further Information
- Q and A

What does it do?

- A system for organizing and facilitating collaborative creation of documents and other content
- Able to monitor content through its lifecycle, and track changes to content, and users of the content
- Content sharing, security, versioning, content lifecycle management, workflow, collaboration, email notifications, dashboards....
- Access – Alfresco Web Client, FTP, WebDAV, CIFS (network share)
– no client software installation necessary
- Alfresco Web Content Management
 - Authoring, Virtualisation, Staging and Deployment for Web Site Management

Community or Enterprise?

- Community

- Functionally Equivalent
 - Same Code Base
- Basic Testing
- May have bugs
- 'Major releases only'
- Support via Forums
 - No SLA

- Enterprise

- Functionally Equivalent
 - Same Code Base
- Rigorous QA and Fixes
- Production Quality
- Maintenance Releases
- Supported
 - Guaranteed SLA
 - Email
 - Telephone
 - Developer (Option)
- Alfresco Connect for Enterprise (ACE)*

* Available Q3 07

Where do I get it?

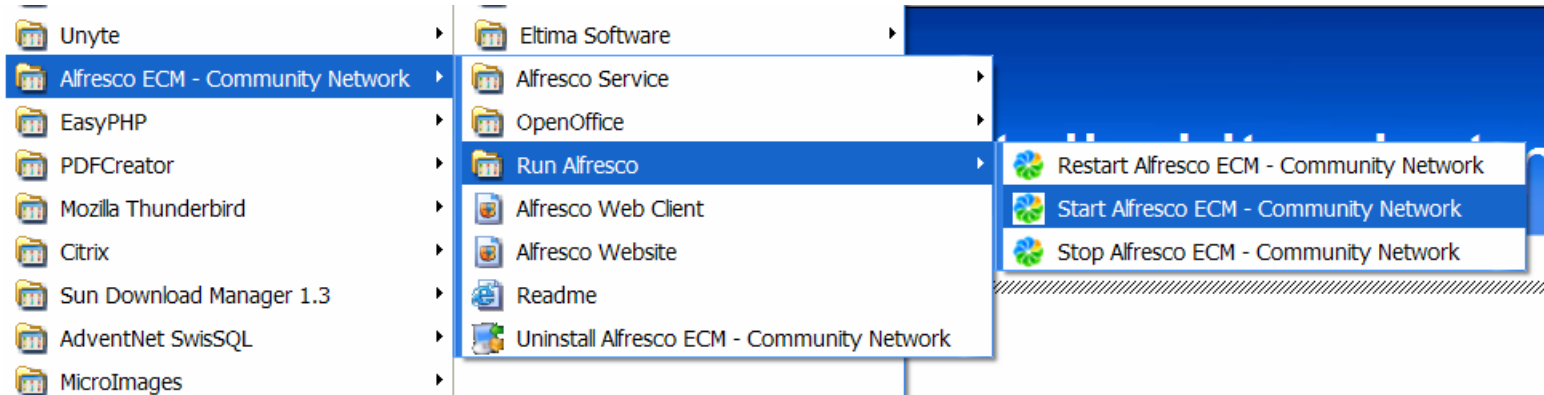

- Installers for Windows & Linux
 - AlfrescoCommunity-2.0-Setup.exe
 - AlfrescoCommunity-2.0-Linux-x86-Install
 - Includes: Alfresco, Tomcat, JDK, Database (HSQL DB) and OpenOffice
- Self Contained Bundles
 - alfresco-community-tomcat-2.0.0.zip
 - alfresco-community-tomcat-2.0.0.tar.gz
 - Includes: Alfresco, Tomcat and Database (HSQL DB)
 - Download JDK, OpenOffice (Optional) Separately
- Community
 - Links from www.alfresco.com
 - SourceForge Downloads
- Enterprise
 - Register at www.alfresco.com
 - Hosted Trial
 - 30 Days
 - Followed by 30 days read only
 - Email Support: support@alfresco.com
 - Enterprise Trial
 - 30 Days
 - All Clients
 - Same bundles as Community
 - Email Support: support@alfresco.com

Starting and Stopping

- Starting

- Self Contained Installer:

- Bundle

- alf_start.bat
- alf_stop.bat

Name	Size	Type	Date Modified

Login in for the first time

- WebClient Login URL
 - <http://localhost:8080/alfresco>
- User Name: admin
- Password:admin
- Note: Guest Login first time

Click here to logout as guest

The screenshot shows the Alfresco WebClient interface. At the top, there is a navigation bar with the Alfresco logo, 'My Home My Alfresco', and a toolbar containing icons for 'Raise an Issue', 'Login (guest)', and a search icon. The 'Login (guest)' button is highlighted with a red box. A red arrow points from the text 'Click here to logout as guest' to this button. Below the navigation bar is a 'Navigator' sidebar with 'My Alfresco' selected. The main content area displays the 'My Alfresco Dashboard' with a 'Getting Started' section containing 'Alfresco Demonstration' and 'Common Tasks'.

Introducing the Web Client

Header

Detail

The screenshot shows the Alfresco web client interface. At the top, there is a navigation bar with links for 'Company Home', 'My Home', 'Guest Home', and 'My Alfresco'. To the right of the navigation bar are utility links: 'Raise an Issue', 'Logout (admin)', and a search box. Below the navigation bar is a 'Shelf' sidebar on the left, which contains sections for 'Clipboard', 'Recent Spaces' (listing 'Company Home' and 'Guest Home'), and 'Shortcuts'. The main content area is titled 'Company Home' and includes a description: 'This view allows you to browse the items in this space. The company root space'. It features a 'Browse Spaces' section with three items: 'Data Dictionary' (User managed definitions, 30 October 2006 11:17), 'Guest Home' (The guest root space, 30 October 2006 11:17), and 'Users' (30 October 2006 13:15). Below this is a 'Content Items' section with two items: 'Guide to Clustering Alfresco-1.3.doc' (423 KB, 30 October 2006 13:18) and 'ProductUpdateRelease1 4 FINAL.pdf' (50.04 KB, 30 October 2006 13:15). The interface is annotated with colored boxes: a red box highlights the 'Shelf' sidebar, a yellow box highlights the 'Company Home' header, a green box highlights the 'Browse Spaces' section, and an orange box highlights the 'Content Items' section.

Hover over an item for a hint of what it does

Getting Started

Alfresco

- Demonstration**
Watch a demonstration of how Alfresco can be used to create a marketing launch.
- Feature Tour**
Take a tour of some of the key features in Alfresco.
- Online Help**
Click the help icon to display Alfresco Help topics.

Common Tasks

- Browse items in your home space**
From the toolbar click My Home to display a list of items in the space.
- Create a space in your home space**
Navigate to your home space. In the space info area, from the menu under Create, click Create Space and enter information about the space.
- Add content to your home space**
Navigate to your home space. In the space info area, click Add Content and enter information about the content to be uploaded.
- Create content in your home space**
Navigate to your home space. In the space info area, click Create Content under Create and enter information about the content to be created.

What is a Space?

- Just like a folder, but more
- Can hold any type of content
- Give a description and choose an icon
- Add sub-spaces and content
- View/Modify details about a space
- Smart Spaces
 - Rules
 - Work with other users Map to Windows network folder

The screenshot displays the Alfresco web interface. At the top, there is a navigation bar with links for 'Company Home', 'My Home', 'Guest Home', and 'My Alfresco'. To the right of the navigation bar are utility icons and a search box. Below the navigation bar is a 'Navigator' sidebar on the left, showing a tree view of spaces: 'Company Home', 'Data Dictionary', 'Guest Home', 'Marketing', and 'User Homes'. The main content area is titled 'Company Home' and contains a description: 'This view allows you to browse the items in this space. The company root space.' Below this, there is a 'Browse Spaces' section with a grid of four space cards: 'Data Dictionary' (User managed definitions, 25 June 2007 11:45), 'Guest Home' (The guest root space, 25 June 2007 11:45), 'Marketing' (Corporate Marketing Information, 25 June 2007 11:52), and 'User Homes' (User Homes, 25 June 2007 11:45). Each card includes a folder icon, a title, a description, a timestamp, and a set of action icons (cut, copy, paste, delete, refresh). At the bottom of the main content area, there is a pagination control showing 'Page 1 of 1'.

What is Content?

- Often can be thought of as a file or document
- Made of two main elements
 - The “content” itself
 - Information about the content (meta-data)
- Content
 - Anything: documents, video, audio, images, XML, HTML
- Properties
 - Format, language, creator, dates
 - Classifications
 - Links to related content
 - Translations
 - Different formats (e.g. PDF, HTML, Text)
 - OCR'd text of scanned image

▼ Properties 

Name:	translatable.ft
Content Type:	Plain Text
Title:	translatable.ft
Description:	Calculates if the document has the translatable aspect applied
Author:	
Size:	0.48 KB
Creator:	System

Modifier:	System
Modified Date:	25 June 2007 11:45
Edit Inline:	Yes

Creating and Editing Content

- HTML or plain Text created and edited in-line
 - WYSIWYG editor in the browser
- Upload content
 - Select file from user computer in the browser
 - Network folders, FTP and WebDAV
- Download from Alfresco to user computer
 - Standard browser feature, choose where to save
 - Network folders, FTP and WebDAV
- Update documents by uploading changed file
- Edit Microsoft Office documents directly

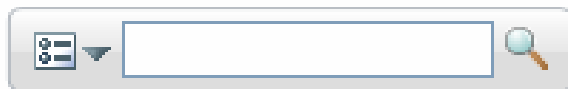

- Inviting Users
- Permission Groups

Consumer	Editor	Contributor	Collaborator	Coordinator	
☺	☺	☺	☺	☺	View all spaces and content
	☺		☺	☺	Update/Edit content
		☺	☺	☺	Add new content
	☺		☺	☺	Edit properties
				☺	Invite others
				☺	Take ownership

Searching Content

- Combined search of both contents and properties
- Full-text search
 - Any words in content, regardless of format
 - Best-match based on number of matched words
- Property constraints
 - By category
 - Between dates
 - Custom properties
- Path constraints
 - Only content below a given space

Advanced Search
Perform a more detailed search of the repository.

Forums and Discussions

- Forum spaces may be defined to contain Forums
 - Using Advanced Space Wizard 'From Scratch'
- Forums may also be associated with spaces and content items
 - Using the "Start Discussion" action
 - Discussions move with the item
- Forums contain Topics which contain Posts
- Posts may have Replies
- Searchable

The screenshot shows a forum discussion page with the following details:

- Breadcrumb:** Company Home > Data Dictionary > Space Templates > Software Engineering Project > Discussions > Content Management Services.pdf discussion > PHP Libraries
- Page Title:** PHP Libraries
- Subtext:** This view allows you to browse posts in this topic.
- Actions:** Create, More Actions, Bubble View
- Section:** Browse Posts
- Post 1:** PHP Libraries Reply to: admin On: 16 February 2007 16:48. Content: "I'd like to some some details on Web Services".
- Post 2:** PHP Libraries On: 16 February 2007 16:48. Content: "We also need to discuss BPEL with regard to Web Services".
- Post 3:** PHP Libraries On: 16 February 2007 16:47. Content: "We need to reference where the PHP Library can be accessed and downloaded".
- Footer:** Page 1 of 1

Using Versioning

- Allows a history of previous versions of an item to be kept
- A new version is created when content is saved, by default
- An item needs to be “versionable” for versions to be kept
 - Individually, via smart spaces, by type or globally
- An example of an “aspect”
- Can look at version history, view previous versions of content – future, revert to version
- Content id always points to the most recent version

Check In and Check Out

- Check Out locks the item and creates a working copy which can be edited (content and details)
- Everyone else can just view the item
- Check In replaces the original item with the working copy and releases the lock

 **general_example (Working Copy).ftl**

Which copy do you want to check in?

Use copy in current space
 Use copy uploaded from my computer

1. Locate document to upload
Location:

2. Click upload

Rules and Actions - Conditions

- Rules are applied to a 'Space'
- Rules make a space 'Smart'
- Rules are triggered by an Event
 - Inbound - content arriving into a space
 - Outbound – content leaving a space, moved, deleted
 - Update – content being modified

- Rules are filtered based on conditions

- All Items (no filter)
- Items with a specific MIME Type (e.g. .pdf)
- Specific Content Type Applied to a specific aspect File name pattern (e.g. *-context.xml)
- Falls within a Category (e.g. Region, Language)

- Rule filter can be applied to 'NOT'
 - e.g. not in MIME Type *.pdf

- No limit on the number of conditions that can be applied to each rule

Company Home > Quality Management > Documentation > Work in Progress

Content Rules

This view shows you all the rules to be applied to content in this space.

Create Rule More Actions Inherited

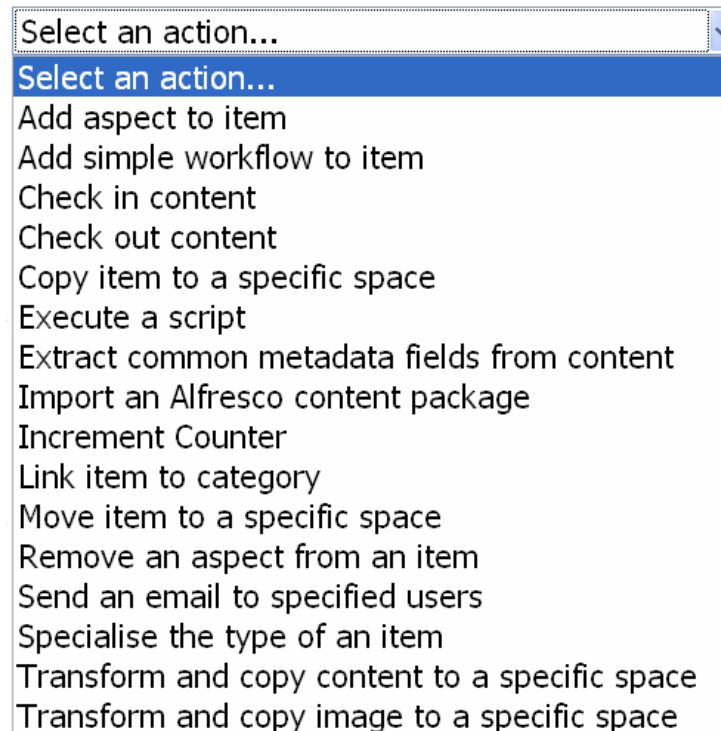

Title	Description	Local	Created Date	Modified Date	Actions
Update Status Property	Auto update status property on the status aspect	Yes	September 8, 2006 10:28 AM	September 8, 2006 10:28 AM	🗑️ ⚙️
Send for Review	Applies the review workflow to incoming Word documents	Yes	September 8, 2006 10:30 AM	February 12, 2007 10:07 PM	🗑️ ⚙️
Make Versionable	Applies the Versionable aspect to Yes inbound Word Documents	Yes	September 8, 2006 10:31 AM	September 8, 2006 10:31 AM	🗑️ ⚙️

Page 1 of 1

Rules and Actions - Actions

- Items that successfully meet the rule conditions have an 'Action' applied to them
- Actions can triggered to run manually
- No limit on the number of Actions per rule
- Rules are used to organise, structure, enrich content in the repository
- Used in conjunction with:
 - Alfresco Web Client
 - FTP
 - WebDAV
 - CIFS (Shared Network Folder)
 - Web Services API
 - Use your imagination

Simple Workflow

- Special case of a Rule
- Applies automated management of document lifecycles
- Moves / Copies content based on user actions

Set action values

Approve Flow

Name for approve step:

Choose whether you want to move or copy the content and also the location.

Move Copy To:

Reject Flow

Do you want to provide a reject step?

Yes No

Name for reject step:

Choose whether you want to move or copy the content and also the location.

Move Copy To:

Space Templates

- Re-useable templates of spaces and content
- Create a library of standard projects
 - Different types of projects have different structures
 - Standardized documents
 - Standardized management
- Create a template in the same way as a space
 - Add sub-spaces and content
- Create spaces based on other spaces

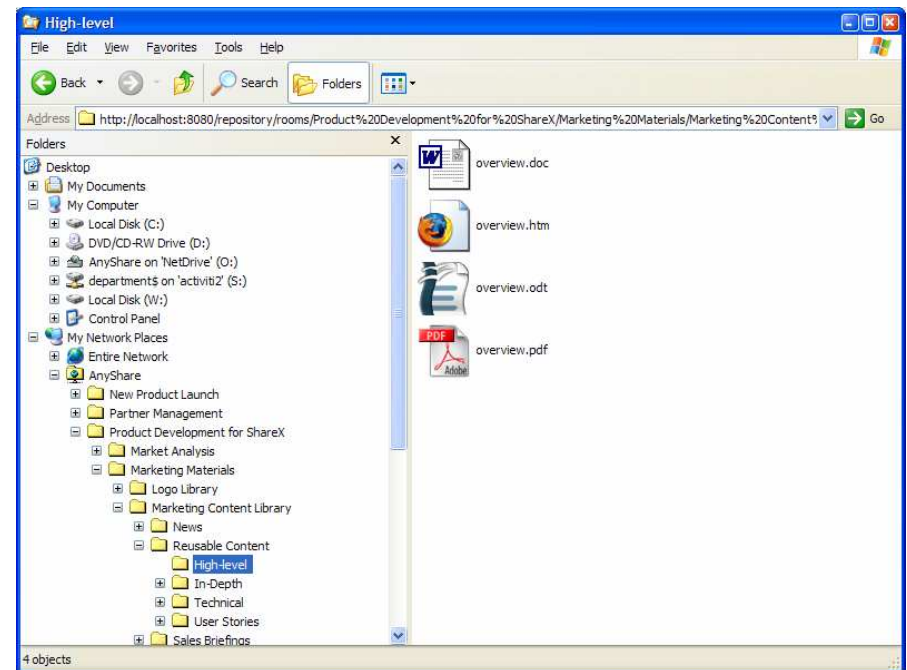

Accessing Content Without The Alfresco Client

- CIFS

- Root URL: `\\<machine name>_A\Alfresco`
- Same as a network share folder
- Can mount as a share drive
- Drag and Drop files into Alfresco
- Edit content directly with other programs
- Network folders can be smart spaces
- Provides user with a link to the same space in the web client

- FTP/WebDAV/CIFS

- All rules are applied
- All permissions are enforced
- If versioning is enabled, then content will be versioned

Alfresco in Action

- Demonstration
